1	Model No:	7420CX
2	Power Consumption	Stand by <50mA, Working <100mA
3	Connection method	4 wire
4	Communication	Simultaneous type
5	Communication Duration	60s(+/-20%)
6	Communication Distance	AWG #22-26, 50-100 meter
7	Operating Temperature	-10°Cto +40°C
8	Weight	Net: 0.22Kg, Gross: 0.32Kg
9	Dimensions (mm)	272*95*35mm

INSTALLATION

After determining the mounting locations for the monitor, fix the mounting bracket securely to the wall. Drill a hole in the Center area of the bracket just large enough for the two wire cable to get through

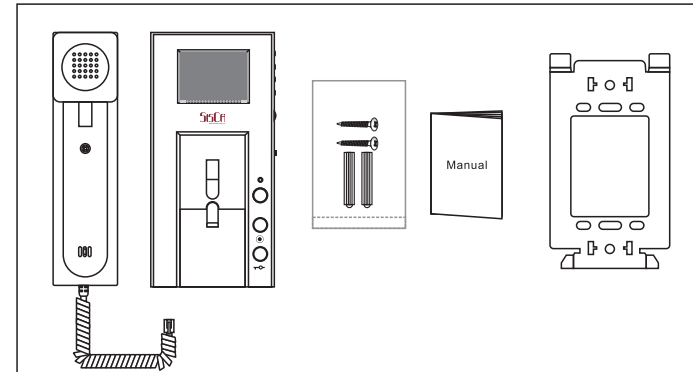

1. Connect the handset cord to the monitor unit.
2. Attach the wired monitor unit to the wall mounting bracket.
3. Connect the 4pin wire to monitor. The power will be supplied from the monitor.
4. Test the unit.

IMPORTANT CAUTIONS

1. To prevent fire or shock hazard, do not expose the unit to rain, moisture or other liquid and do not overload the power cord.
2. Instructions! Read and keep the instructions-all safe and operating instructions should be read and followed before the unit is operated.
3. Power Sources! This equipment should be operated only from the type of power source indicated on the marking label and the power cord protection is needed.
4. Servicing and replacement of parts! Do not attempt to service this product or replace any parts inside by yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
5. Lightning! For added protection for this product before a lightning storm, or when it is left unattached and unused for long periods of time, unplug it from the wall outlet and disconnect the cable system. This will prevent damage to the product due to lightning and power-line, telephone-line, RF cable and Actuator/Polarization surge protectors to protect your system from possible damage.
6. Move with care! This product is easy for damage, care for it during transportation, storage and installation.
